To whom it may concern,

We recently completed a large refurbishment project over the summer period, on campus, with Cleary Doyle as the main contractor. The works involved the conversion of 9 no. existing computer science laboratories into new state of the art teaching spaces (along with the full refurbishment and extension of ground and first floor toilet facilities / new glazed entrance and revolving door). The works were completed under an extremely tight programme - commencing in July, and all rooms were fully operational for the following semester in September. The project was completed within budget and programme.

At all times Cleary Doyle approached the project with a solution based approach and were extremely accommodating to any requests from ourselves and worked very closely with in house departments (Audio Visual, Computer Centre, Security, Health & Safety) to close out the project.

It was a pleasure to work with Cleary Doyle on this job and I look forward to the opportunity to work with them again in the future.
